PROFESSIONAL SUMMARY

Motivated Computer Engineering student with hands-on experience in Web Development. Proficient in HTML, CSS, JavaScript, PHP, and MySQL. Skilled in building responsive interfaces and managing backend databases, seeking to leverage technical expertise in a professional software environment.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, PHP

Web/DB: HTML5, CSS3, JavaScript (ES6+), MySQL, SQLite

Concepts: DSA, OOP, DBMS, OS, Computer Networks

Tools: VS Code, Git/GitHub, Android Studio

WORK EXPERIENCE

Web Development Intern | V2V EdTech LLP

Jun 2024 - Aug 2024

- Developed and maintained responsive web components using HTML5, CSS3, and JavaScript, improving mobile UX.
- Engineered backend logic for secure form handling and server-side data processing utilizing PHP.
- Integrated and optimized MySQL databases for dynamic content storage and retrieval.
- Collaborated with the dev team to debug legacy code and optimize site load speeds.

PROJECTS

Smart Healthcare Application: Designed a user-centric portal for structured patient data handling and real-time records.

AI Email Detector Tool: Created a text-analysis tool to distinguish between human and AI-generated content.

Frozy Ice Cream Website: Engineered a responsive e-commerce landing page focused on branding and high-conversion UI/UX.

Book Shop Website: Developed a dynamic web app with full PHP/MySQL connectivity for inventory management.

EDUCATION

B.E. Computer Engineering | Sardar Patel Institute of Technology (SPIT)

Result: Currently Pursuing

Diploma in Engineering | Government Polytechnic, Thane

Result: 89.71%

EXTRACURRICULAR ACTIVITIES

- Open Source Contributor: Actively contributing to GitHub repositories for front-end bug fixes and UI improvements.
- Technical Mentorship: Conducted a 'Web Dev 101' workshop for 30+ peers, covering the basics of PHP and databases.
- Tech Blogging: Regularly publishing technical articles on AI tools and web dev trends to a growing student community.
